APPENDIX A - PROGRAM MAPS

(Vocational Program Outcomes & Essential Employability Skills Outcomes)

Vocational Program Learning Outcomes:

Form 1 (attached) is provided to assist you in mapping your proposed program vocational learning outcomes against existing vocational outcomes found in either Provincial Program Standards or in Provincial Program Descriptions. When completing this form, please be sure to include the MTCU code (where applicable) for the program category being referenced.

Where there is a relevant Provincial Program Standard, the approved Vocational Learning Outcomes must appear in the first column, followed by your proposed program vocational learning outcomes.

Where there are no Provincial Program Standards, the first column will contain program outcomes from the Provincial Program Description. Again, your proposed program vocational learning outcomes will be added in the middle column.

NOTE: Both these types of documents can be obtained from staff at the CVS or at the Colleges Branch, MTCU.

The last column will contain a list of the relevant curriculum proposed in your program to address the outcome in a manner that ensures the graduate will have reliably demonstrated the required skill or ability. Course numbers or course codes, corresponding to those provided in your list of courses (Appendix C), are sufficient in this column.

Essential Employability Skills Outcomes:

A mapping of the Essential Employability Skills (EES) will be done on Form 2 (attached).

The instructions / requirements for this map are the same as for the Vocational Program Map. The first three columns contain the approved skill categories, the defining skills, and the EES learning outcomes. The last column will contain the proposed curriculum (as listed in Appendix C) that will ensure the meeting of these outcomes.

APPENDIX B - PROGRAM DESCRIPTION

PROGRAM DESCRIPTION: (including occupational areas where it is anticipated graduates will find employment)

The three year, Ontario College Advanced Diploma, Massage Therapy program at Fanshawe College is built around the guiding principles of the College of Massage Therapists of Ontario (CMTO). This particular program explores curriculum beyond just the minimum required for licensure. With a strong focus on medical knowledge, students will be exposed to many learning opportunities; both in and out of the classroom. Some very unique to the Fanshawe London program.

The professional faculty, including Registered Massage Therapists, medical professionals and seasoned instructors will provide students with a high calibre experience. Students will learn, first hand, that the practice of massage therapy is the "assessment of the soft tissue and joints of the body and the treatment and prevention of physical dysfunction and pain of the soft tissues and joints by manipulation to develop, maintain, rehabilitate, or augment physical function, or relieve pain," as according to The Massage Therapy Act of Ontario. The Massage Therapy program at Fanshawe is both challenging and rewarding. Through this program, you can acquire more than the core knowledge and skills required to succeed as a massage therapist.

Theory and practice are integral to the program, and students will be exposed to directly learning the skills of a Massage Therapist in the first semester. Individual attention is spent by the faculty to ensure you achieve the utmost from your education. Many adjunct therapies to the Massage Therapist will be studied, including: sport massage, clinical massage, pregnancy massage; to name a few.

Successful students will be recommended to the CMTO for their entry exams to the profession. The faculty at Fanshawe will provide every measure to ensure you receive the greatest preparatory education to take these exams with confidence.

VOCATIONAL PROGRAM LEARNING OUTCOMES: (vocational program learning outcomes must be consistent with the requirements of the Credentials Framework for the proposed credential)

The graduate has reliably demonstrated the ability to:

1. Conduct a massage therapy practice within a legal, professional and ethical framework.
2. Apply business principles relevant to a massage therapy practice.
3. Communicate and collaborate effectively and professionally with clients, colleagues and members of the inter-professional team.
4. Develop and maintain therapeutic relationships to optimize clients' health and wellness.
5. Collect and assess clients' information to determine their state of health and treatment goals.
6. Develop a plan of care according to the client's condition and treatment goals.
7. Implement the plan of care according to the client's condition and the treatment goals.
8. Evaluate the effectiveness of the plan of care.
9. Maintain documentation securely, accurately and in a timely manner.
10. Develop and implement ongoing effective strategies for personal and professional development to ensure quality care.

ADMISSION REQUIREMENTS:

Ontario Secondary School Diploma (OSSD) with courses from the College (C), University (U), University/College (U/C), or Open (O) stream WITH:

- Any Grade 12 English (C) or (U)

- Mathematics ONE OF:

- Grade 11 Mathematics (U) or (U/C) OR

- Grade 12 Mathematics (C) or (U)

Science ONE OF:

- Grade 11 or Grade 12 Biology (C) or (U) OR

- Grade 11 or Grade 12 Chemistry (C) or (U)

Science ONE OF:

- Grade 11 Science (SNC3M or equivalent) OR
- Grade 12 Exercise Science (PSE4U or equivalent)

(Note: minimum final grade required for each course is 65)

- This is a highly competitive program and applicants should strive to achieve an average in the 70's to 80's which includes the best six Grade 12 University (U) or University/College (U/C) courses which also includes the pre-requisite courses.

OR

Academic and Career Entrance Certificate (ACE) WITH:

- Communications
- Core Mathematics
- Biology
- Chemistry

(Note: minimum final grade required for each course is 65)

OR

Pre-Health Science Ontario College Certificate*

(Note: minimum final average required is 3.0 GPA) AND:

- minimum final grade of 'C+' or 65 in the required courses stated above

OR

General Arts and Science Ontario College Certificate**

(Note: minimum final average required is 3.0 GPA) AND:

- minimum final grade of 'C+' or 65 in the required courses stated above

OR

Ontario High School Equivalency Certificate (GED) WITH:

- The combined Language Arts - Reading AND Language Arts - Writing test results having a minimum average Standard Score of 520 AND:

- Mathematics ONE OF:

- Grade 11 Mathematics (U) or (U/C)
- Grade 12 Mathematics (C) or (U)

- Grade 11 or Grade 12 Biology (C) or (U)

- Grade 11 or Grade 12 Chemistry (C) or (U)

(Note: minimum final grade required for each course is 65)

OR

Mature Applicant with standing in the required courses and grades stated above

All applicants will be required to achieve course credit in the mandatory sciences, through Secondary School or through Academic Upgrading programs.

CREDENTIALS VALIDATION SERVICE**

APPENDIX C - PROGRAM CURRICULUM

Semester	Course Code*	Course Title (and brief course description)
1	MSTPxx11	Massage Theory & Lab I In this first semester study students will be introduced to the history of massage therapy, appropriate body mechanics, safety, universal health precautions, informed consent and the basic techniques that comprise massage therapy. Students will hone their skills with direct hands-on learning of important principles related to sequencing techniques, palpation, and muscle tone.
1	MSTPxx12	Professional Growth I Massage therapy is a self-governing profession under the College of Massage Therapists of Ontario (CMTO) which is directed by the Regulated Health Professions Act and the Massage Therapy Act. Students will learn their role in regards to these acts as well as how to incorporate the Standards of Practice into their own therapy. Topics of study will relate to jurisprudence, ethics, and the regulatory foundations of massage therapy in Ontario. There will be opportunity to interact with fellow classmates and develop critical thinking skills needed to succeed in massage therapy while working on various in-class projects.
1	MSTPxx13	Anatomy for Massage I This course will introduce students to the very core of massage therapy; the study of the human body. Students will be introduced to the language of anatomy: Location, direction, movement, and an in-depth analysis of the musculoskeletal system. Students will re-enforce their learning through interactive mediums, class discussions, and hands-on palpation labs.

1	MSTPxx14	Physiology I Understanding how the systems of the body work will be the focus of this course. Students will learn the language of physiology the cell, tissues and membranes, as well as a detailed analysis of the musculoskeletal and integumentary systems. The content develops the foundation to understanding homeostatic function, pathologies and conditions that massage therapists encounter.
1	MSTPxx15	Personal Wellness This course identifies the determinants of healthy lifestyles by examining the scientific literature regarding lifestyle choices that promote optimal health. The course provides the opportunity for personal goal-setting for health enhancement and application of health risk evaluation tools.
1	WRIT-1048 (General Education)	Reason & Writing for Health Sciences This course will introduce health sciences students to essential principles of reading, writing, and reasoning at the postsecondary level. Students will identify, summarize, analyze, and evaluate multiple short readings and write persuasive response essays to develop their vocabulary, comprehension, grammar, and critical thinking. This course will also introduce students to selected issues and terms in health sciences.
2	MSTPxx21	Massage Theory & Lab II Building on Massage Theory & Lab I, this course develops a greater awareness of the physiological and psychological effects of massage therapy in the healthy adult. Students will be given the opportunity to practice advanced massage techniques and integrate knowledge of massage theory. Students will be able to apply their knowledge gained in Anatomy, Physiology and Professional Growth to a massage session. An introduction to the practice of assessments will be the culmination of this course.

2	MSTPxx22	Business Writing for Massage Therapists Utilizing, and expanding upon, the knowledge gained in Professional Growth and WRIT-1048 this course develops the written and oral communication skills used by massage therapists. Students will demonstrate the ability to read and write workplace materials including business correspondence, medico-legal reports, X-Ray & scan reports, plus more. Students will also delve into how to prepare promotional materials such as brochures and websites. Individual and group presentation skills are also honed.
2	MSTPxx23	Anatomy for Massage II Continuing where MSTP9013 left off students will further study the human body with focus on the trigger point matrix, joints, nervous, cardiovascular, lymphatic, respiratory, digestive, and reproductive systems. As previously; students will re-enforce their learning through interactive mediums, class discussions, and hands-on palpation labs. The in depth analysis of the trigger point matrix as an anatomy study is unique to Fanshawe and will give students a firm understanding of its role in a massage therapy treatment and the importance of accurate palpation skills.
2	MSTPxx24	Physiology II This course will further study the physiological functions of the respiratory, digestive, urinary, lymphatic, neurological, endocrine and reproductive systems. The content further develops the foundation to understanding homeostatic function, pathologies and conditions that massage therapists encounter.
2	PSYC-1065 (General Education)	Psychology I Have you ever wondered why you or someone else behaves in a particular way? If so, then welcome to Introductory Psychology! Psychology is the study of who we are and why we do what we do: our thoughts, feelings, and behaviours. This two-part course will offer you opportunities to explore the various aspects of Psychology, including the development of the mind, how we learn and remember what we do, and how we interpret the world around us. We will discuss topics in genetics, cognition, language and

		behaviour, and apply them to our everyday lives.
3	MSTPxx31	Orthopedic Assessment Theory & Lab I Following on the heels of Massage Theory and Lab; this course will provide the student with the knowledge, skills, and professionalism needed to complete a musculoskeletal assessment of a client. The differential diagnosis process will be taught through; analysis of clinical signs and symptoms, postural scan, ROM testing, orthopaedic tests, muscle strength/length testing, reflexes, dermatomal testing, myotomal testing, joint accessory movement testing, and palpation. Students will learn to chart all the information they acquire as per the CMTO requirements and maintain them.
3	MSTPxx33	Introduction to Clinic This course introduces students to our on-site massage clinic and the operational aspects of running a clinic. Students will have scheduled hours in the clinic and perform clinic duties as assigned. Direct interaction with patients is a key element and will allow students to have a ``real world`` opportunity to practice all their acquired skills to date.
3	MSTPxx34	Thermotherapy This course will provide students with the principles, techniques, and application of hydrotherapy, ultrasound and laser therapy. The uses, physiological effects, and contraindications of a variety of local and general applications of hot and cold will be discussed. Emphasis will be placed on integrating clinical applications of thermotherapy techniques into a massage therapy treatment plan effectively.
3	MSTPxx35	Psychology of Manual Therapy Massage therapists have individuals come to them in various states of pain and dis-ease looking for a plan of recovery, maintenance or prevention. This course introduces concepts of psychology that are relevant to the states of mind that these individuals present with including: muscular responses to trauma and abuse, altered body image, guarding and body structure, emotional release, psychology of degenerative disease and the dying process,

		and issues relating to clients with psychopathological conditions, including when to refer.
3	NUTR-1016	Essentials in Human Nutrition This course provides an introduction to the science of nutrition with particular emphasis on the basic nutrients, their sources and contribution to the normal physiology of the body. Nutritional concepts related to metabolism, weight control, fitness and performance will also be covered.
3	SOCI-1043 (General Education)	Sociology I Are you curious about why some things in society change while others stay the same? Who controls our social world? What drives people to make the choices that they do? These are examples of some of the questions we will be answering together in Introductory Sociology. As we uncover the answers, we will examine assumptions related to the ideas of freedom, equality, and democracy that shape our understandings of life options. The specific topics we will engage cover a wide range of sociological enquiries about culture, deviance, crime, sex, gender, poverty, and globalization.
4	MSTPxx41	Massage Treatment Theory & Lab I Students will advance their knowledge of massage therapy principles and critical-thinking skills through considering impairments, functional limitations, and desired outcomes for acute, sub-acute and chronic musculoskeletal and neurological conditions. Students learn how to integrate Orthopedic Assessment skills with treatment planning, treatment modalities, and self-care. There will be an emphasis on integrating basic and advanced massage therapy techniques, along with client self-care, to achieve desired treatment outcomes.
4	MSTPxx42	Pathology for Massage I This course a general study of the major diseases affecting the joints, skeletal muscles and skin, the visceral and cardiovascular systems, blood and the central nervous system. Emphasis will be placed on those pathologies commonly encountered by massage therapists and will be

		integrated into the Massage Treatment course. The etiology, pathogenesis, and clinical features of the various disorders are emphasized.
4	MSTPxx43	Clinic Practice I This course will further provide the student with a clinical placement to apply the knowledge, skills, and professionalism acquired in semesters 1 through 3. Clients will present with limited ailments and pathology to allow students an ability to transition their knowledge smoothly. Students will be guided and evaluated by a clinical instructor.
4	MSTPxx44	Evidence Based Practice Evidence Based Practice focuses on utilizing research that has been published in a recognized medium to quantify and qualify ones treatment planning. This course will provide students with the knowledge, skills, and professional attitudes needed to locate and evaluate said research evidence, and to apply it to a clinical practice. Students will also be introduced to the basic concepts in developing their own skills to lead into clinical research in Complementary and Alternative Medicine (CAM).
4	MSTPxx45	Outreach Practicum I Students are now able to participate in a variety of outreach opportunities including: sporting events, office massage, festivals, job-fairs, and working with health care agencies to name a few. Opportunities arise at random intervals and locations; however students will be given advanced notice to take part; allowing sufficient time to arrange extra-curricular endeavours. As well, Fanshawe has a unique relationship through both college sport teams and some local university sport teams which allow students to participate in a weekly team therapy session.
4	MSTPxx46	Kinesiology for Massage I This course will provide a basic understanding of human biomechanics and will introduce students to all aspects of exercise including the practical and theoretical knowledge of cardiovascular conditioning, resistance exercises, stretching, range of motion, and relaxation techniques. This foundation will be utilized in formulating remedial exercise

		and self-care within a treatment plan.
4	MSTPxx47	Sport Team Interaction Many students explore the idea of working with athletes on some level during the course of their anticipated career. Even those who don't consider it will find themselves working with an athlete of some kind. In this exclusive course to Fanshawe, students will be taught the proficiencies needed when providing therapy to an athlete, interacting with a team staff and even what to do if faced with media interaction. Students will gain confidence that they can be party to this field of therapy.
5	MSTPxx51	Massage Treatment Theory & Lab II This course continues to advance the knowledge of Massage Treatments Theory & Lab I. Students will continue to use the massage therapy principles and critical-thinking skills to apply and evaluate a plan of care. Further conditions and clinical cases will be evaluated to garner a greater understanding of signs & symptoms, structures involved, impairments and functional limitations. Students will continue to generate a plan of treatment using treatment modalities, and self-care to achieve desired outcomes for acute, sub-acute and chronic musculoskeletal and neurological conditions.
5	MSTPxx52	Pathology for Massage II This course continues the study of major diseases affecting the joints, skeletal muscles and skin, the visceral and cardiovascular and lymphatic systems, blood and the central nervous system. Emphasis will be placed on those pathologies commonly encountered by massage therapists and will be integrated into the Massage Treatment course. The etiology, pathogenesis, and clinical features of the various disorders are emphasized.
5	MSTPxx53	Clinic Practice II Student will be introduced to increased time in the Fanshawe Student Clinic and will further apply the increasing knowledge, skills, and professionalism acquired up to their current semester. Students will find that they will be exposed to clients who present with greater complications and pathology to challenge their skills and

		knowledge. As with the previous clinic, students will be evaluated by, and have the guidance of, a clinical instructor. Emphasis will be on greater independence with plan development and implementation; part of which will include mentoring a 3 rd semester student in clinic.
5	MSTPxx52	Pathology for Massage II This course continues the study of major diseases affecting the joints, skeletal muscles and skin, the visceral and cardiovascular and lymphatic systems, blood and the central nervous system. Emphasis will be placed on those pathologies commonly encountered by massage therapists and will be integrated into the Massage Treatment course. The etiology, pathogenesis, and clinical features of the various disorders are emphasized.
5	MSTPxx53	Clinic Practice II Student will be introduced to increased time in the Fanshawe Student Clinic and will further apply the increasing knowledge, skills, and professionalism acquired up to their current semester. Students will find that they will be exposed to clients who present with greater complications and pathology to challenge their skills and knowledge. As with the previous clinic, students will be evaluated by, and have the guidance of, a clinical instructor. Emphasis will be on greater independence with plan development and implementation; part of which will include mentoring a 3 rd semester student in clinic.
5	MSTPxx55	Outreach Practicum II Students will continue to participate in a variety of outreach opportunities including: sporting events, office massage, festivals, job-fairs, and working with health care agencies to name a few. Opportunities arise at random intervals and locations; however students will be given advanced notice to take part; allowing sufficient time to arrange extra-curricular endeavours. Students will continue to be able to take advantage of Fanshawes unique relationship with some college and local university sport teams which allow students to participate in a weekly team therapy session.
5	MSTPxx56	Kinesiology for Massage II This course will further develop the understanding of human biomechanics and all aspects of exercise including the

		<p>practical and theoretical knowledge of cardiovascular conditioning, resistance exercises, stretching, range of motion, and relaxation techniques. Students will also perform fitness assessments, demonstrate motivational and leadership strategies, lead group fitness classes, and prescribe exercise. Students will also be required to monitor and assess their own personal levels of fitness and wellness. The knowledge gained in this course will be utilized in formulating remedial exercise and self-care within a treatment plan.</p>
5	BUSI-1070	<p>Small Business Ownership</p> <p>Welcome to the world of small business! Obtain the knowledge required to plan, start and manage your own small business. Topics covered include preparing a business plan for a new business and examining alternatives to starting a new business. This course will give you insight into the challenges and rewards of being a small business owner and help you decide whether small business ownership is right for you.</p>
6	MSTPxx61	<p>Massage Treatment Theory & Lab III</p> <p>In this final Massage Treatment course students will complete their advancement through studies of clinical cases and the conditions that have proven treatable with massage therapy. There is an emphasis on a smooth transition from assessment to treatment plan generation. Students will be given the opportunity to consolidate all previous learning to prepare for the Registration examinations (OSCE & MCQ).</p>
6	MSTPxx62	<p>Pathology for Massage III</p> <p>This course completes the study of major diseases affecting the joints, skeletal muscles and skin, the visceral and cardiovascular and lymphatic systems, blood and the central nervous system. Emphasis will be placed on those pathologies commonly encountered by massage therapists and will be integrated into the Massage Treatment course. The etiology, pathogenesis, and clinical features of the various disorders are emphasized. Students will be given review sessions designed to prepare the student for the Registration exam.</p>

6	MSTPxx63	Clinic Practice III Student will be continue to spend time in the Fanshawe Student Clinic and will further apply the increasing knowledge, skills, and professionalism acquired up to their current semester. Students will find that they will be exposed to clients who present with various complications and pathologies to challenge their skills and knowledge. As with the previous clinic, students will be evaluated by, and have the guidance of, a clinical instructor. Emphasis will be on greater independence with plan development and implementation.
6	MSTPxx64	Professional Growth and Entrepreneurship Continuing from Professional Growth I and Small Business ownership students will have the opportunity through this exclusive Fanshawe course to explore the topics that concern specifics to operating a massage therapy business and the interaction with various other professionals. Students will learn the basics for completing forms for motor vehicle incidents and third party insurance forms. The requirements of business operation as described by the CMTO will be discussed. Basic information in regards to what various other health professionals' roles are in the health care team and how you can integrate into that team will be examined. The knowledge gained from this course will be invaluable to the new Massage Therapist.
6	MSTPxx65	Outreach Project This course is another one unique to Fanshawe Students, who will use their knowledge gained throughout the 5 semesters and specifically from Evidence Based Practice to engage in a study in a field of their choosing to investigate the use of massage therapy as it applies to Complementary and Alternative Medicine research. Students can find possible opportunities within clinics, hospitals, sport teams, or almost any field they so wish. The culmination will be a presentation to the class of what has been learned from the experience in the interest of sharing knowledge.

6	MSTPxx66	<p>Massage Therapy Consolidation & Comprehensive Preparation, and Mock OSCE & MCQ Examinations</p> <p>This course prepares the massage therapy student to take the Multiple Choice Questionnaire (MCQ) and Objectively Structured Clinical Examination (OSCE) required by the CMTO for entry to practice. The culmination of the course will be the Mock OSCE and MCQ Examination. Students must pass this set of exams to pass the Massage Therapy Program and be recommended to the CMTO and be able to take their exams. The focus of this course will be consolidating the accumulated knowledge and application of massage therapy over the full 6 semesters.</p> <p>This examination process takes place over 2 days with the first being the writing of the MCQ (3hrs) and the second being the participation in the OSCE (2hrs). These examinations mirror the exams presented by the CMTO and will draw upon all material covered over the full 3 years. Successfully passing these examinations is a requirement for graduation from the Massage Therapy Program.</p>

ONTARIO COLLEGES OF APPLIED ARTS AND TECHNOLOGY CREDENTIALS VALIDATION SERVICE

APPENDIX D – REGULATORY STATUS FORM

MANDATORY REGULATORY REQUIREMENTS

Where licensing or certification is **required by legislation** for entry to practice in the profession or trade, the Ministry of Training, Colleges and Universities requires that colleges ensure that their programs will meet the requirements of the regulatory body in order to be approved for funding.

- There is a legislative requirement that program graduates must be certified or licensed by a regulatory authority to practice or work in the occupation.

Name of regulatory authority _____

- (A*)** The program has been accredited or approved by the regulatory authority or its identified third party?

OR

- (B*)** The college is working toward accreditation with the regulatory authority.

Status of application and expected date of achievement _____

- (C*)** If the regulatory authority does not accredit educational programs directly or by an identified third party, has it formally acknowledged (e.g. in its published or legislated registration requirements) that the program graduates will be eligible to write any required certifying or registration exam or that the program is otherwise recognized for the purposes of certifying or registering a graduate?

***Please submit an acknowledgement and/or evidence from the regulatory authority to support (a) or (b) or (c) above.**

VOLUNTARY REQUIREMENTS

Colleges may choose to have a program accredited or recognized by a voluntary membership organization or association. Graduate eligibility for association recognition or adherence to standards imposed by the body is **not a requirement** for program funding approval by the Ministry of Training, Colleges and Universities.

Recognition of the program by a voluntary professional body:

Is being sought: Name of professional body: _____

The college is working toward recognition.

Status of application and expected date of achievement: _____

Upon approval of the program by the MTCU the College of Massage Therapists of Ontario (CMTO) will recognize graduates of the Fanshawe College Massage Therapy program as eligible to write their exams for entry to practice. Currently the CMTO does not require accreditation for a massage therapy program. However they are reviewing the process for such and therefore it is sometime yet before it will become implemented.

This is a copy of a letter from the CMTO confirming the above:

Good afternoon Chris.

The MTCU registration as a Private Career College would apply.

The College does not have an accreditation provision at this time but a proposed amendment to the registration regulation has been submitted to the Ministry of Health for consideration.

Regards,

Penny Connors
