MTA4 Motive Power Technician - Automotive

MTD4 Motive Power Technician – Automotive Apprentice

MTA5 Motive Power Technician – Diesel

MTD5 Motive Power Technician – Diesel Apprentice

Courses containing theory and lab learning components are being split into two courses – one for theory and one for lab. This is a student success initiative as students sometimes fail either the theory or lab portion and currently would need to retake the whole course to gain credit for the portion they failed.

Recommendation: Approve the request

Deb Wilkin

**Subject:** DA's for power technician program

Hi Deb,

I hope you're not locked down too tightly today!

Things are nice and quiet down here at Z.

I just wanted to give you a heads up that we will be sending along the DAs that we spoke about before. These are the ones where we took our technician program and split the courses into separate lab and theory components. Nothing else is changed other than new course numbers and the addition of lab or practical in the title. This was done as a student success initiative so that if a student failed only one portion of the course such as theory our lab, then they didn't have to repeat the whole course to get credit

Thanks,

Rob
